

Case ID Guide for reporting sites

Below is essential information on creating a Case ID to form part of the IDSR IDs:

- ⇒ **Case ID** = The Case ID is simply a number assigned to a case in order, starting at **“001”**.
- ⇒ Ensure that the facility has an **“ID Book”** to reference and assign Case IDs.
- ⇒ You can reference the **“ID Book”** for the number to assign to the case.
- ⇒ Do not reuse any of the numbers in the book, cross them out after use.
- ⇒ The code is **NOT** disease-specific but based on the facility's suspected cases.
- ⇒ For every additional case, increase the count, or case number, by one.
- ⇒ **This count never restarts at 001 until a new Epi year starts.**
- ⇒ Reference previous IDSR Alert forms to reference the last Case ID assigned.
